```python
from itertools import permutations
word1 = "SEND"
word2 = "MORE"
result = "MONEY"
letters = set(word1 + word2 + result)
for p in permutations(range(10), len(letters)):
    d = dict(zip(letters, p))
    if d[word1[0]] == 0 or d[word2[0]] == 0 or d[result[0]] == 0:
        continue
    a = int("".join(str(d[c]) for c in word1))
    b = int("".join(str(d[c]) for c in word2))
    c = int("".join(str(d[x]) for x in result))
    if a + b == c:
        print(a, "+", b, "=", c)
        break
```

```
9567 + 1085 = 10652

Process finished with exit code 0
