```python
room = {'A': 1, 'B': 1}
location = 'A'
while 1 in room.values():
    print("Vacuum cleaner is in room", location)
    if room[location] == 1:
        print("Room", location, "is Dirty. Cleaning...")
        room[location] = 0
    else:
        print("Room", location, "is Clean")
    if location == 'A':
        location = 'B'
    else:
        location = 'A'
print("Both rooms are clean!")
```

```
Vacuum cleaner is in room A
Room A is Dirty. Cleaning...
Vacuum cleaner is in room B
Room B is Dirty. Cleaning...
Both rooms are clean!
