```python
# Python Program to Transpose a Matrix

r = int(input("Enter number of rows: "))
c = int(input("Enter number of columns: "))

print("Enter matrix elements:")
A = []
for i in range(r):
    row = []
    for j in range(c):
        row.append(int(input()))
    A.append(row)

# Transpose of matrix
T = []
for j in range(c):
    row = []
    for i in range(r):
        row.append(A[i][j])
    T.append(row)

print("Transpose of Matrix:")
for row in T:
    print(row)
```

```
Enter number of rows: 2
Enter number of columns: 2
Enter matrix elements:
1
2
3
4
Transpose of Matrix:
[1, 3]
[2, 4]

Process finished with exit code 0
